Paris,
France

I'm currently a Front-End developer and a React consultant at Infinite Square.

After 2 years at Infinite Square and a few missions as a Front-End developer as well as a project manager, I'm now switching to freelancing in early 2021.

Do not hesitate to contact me if you have a web project or a mission.

Front-End Web developer and React consultant

Infinite Square - Since March 2019 - Full-time - Paris - France

- ▶ Global context: Full-time contract at Infinite Square. During these two years, I've worked on many projects for clients as a Front-End developer, mainly on React.js and Angular frameworks.
- ▶ Web projects development under React.js and Angular.
- ▶ Projects architecture
- ▶ HTML / CSS responsive integration
- ▶ Writing articles on Front-End development for the company's blog.
- ▶ Technical environment: REACT, WEBPACK, TYPESCRIPT, HTML5, CSS3, REDUX, GIT, LESS

Front-End Web developer (Infinite Square mission)

NDA - Since March 2020 - Paris

- ▶ Global context: 11-month mission during my full-time contract at Infinite Square where I was positioned in the client's offices. The aim of the mission was to develop a product.
- ▶ Development of the product under React.js
- ▶ Development of graphical components in the client's design system with unit tests and accessibility.
- ▶ HTML / CSS responsive integration
- ▶ Technical environment: REACT, WEBPACK, TYPESCRIPT, MOBX, HTML5, CSS3, GIT, JEST, MATERIAL-UI, REACT-TESTING-LIBRARY

Front-End Web developer (Infinite Square mission)

Lumapps - June 2019 to December 2019 - Paris - France

- ▶ Global context: Mission of 6 months during my full-time contract at Infinite Square where I was positioned in the client's offices and was part of the Lumapps development team. Lumapps is a company which develops a social intranet for companies. The aim of our intervention was to help them in the development of widgets integrating Microsoft Office 365 services.
- ▶ Development of widget under React.js / Angular.js
- ▶ HTML / CSS responsive integration
- ▶ Front development of a plugin for Microsoft Office Word and Excel allowing to export the content of a document directly on Lumapps
- ▶ Technical environment: REACT, ANGULARJS, WEBPACK, TYPESCRIPT, HTML5, CSS3, REDUX, GIT, SASS

Front-End developer (Infinite Square mission)

Pernod Ricard - February 2020 to March 2020 - Paris

- ▶ Global context: One-month mission during my full-time contract at Infinite Square. The aim of the project was to develop a web app for Pernod Ricard, similar to a calendar app allowing them to manage an internal B2B event.
- ▶ Architecture and boot of the project
- ▶ Development of the solution under React.js
- ▶ HTML / CSS Integration
- ▶ Pull-Request reviews

- ▶ Technical environment: REACT, WEBPACK, TYPESCRIPT, BABEL, HTML5, CSS3, GIT, SASS

Freelancing

Small business - March 2017 to May 2018

- ▶ Writing projects fonctionnals specifications
- ▶ Landing-pages development
- ▶ Update of websites graphical charter

Front-End web Web developer (Infinite Square mission)

Hokifish - September 2018 to March 2019 - Paris

- ▶ Global context: 6-month mission during my full-time contract at Infinite Square. Hokifish is a product developed by Infinite Square. The aim of the project is to design a SaaS storage and file sharing product directly linked to the client's Azure subscription.
- ▶ Development of the V2 of the product under React.js
- ▶ Global design rework of the interface based of the new models provided. HTML / CSS integration
- ▶ Responsive integration of the hokifish showcase site using parallax.
- ▶ Technical environment: REACT, WEBPACK, TYPESCRIPT, HTML5, CSS3, REDUX, GIT, LESS

Front integrator (Freelance mission)

Mr. Marguerite - March 2018 to April 2018 - Freelancer

- ▶ Global context: Main project during my first experience as a freelancer. Mr. Marguerite is a company that proposes many offers for flower delivery. The aim of this mission was to develop their new landing-page.
- ▶ HTML / CSS responsive integration
- ▶ Project management
- ▶ Technical environment: HTML, CSS, SASS, BOOTSTRAP, GRUNT, GIT, JAVASCRIPT
